### What's New in the WinTask Lite?

WinTask provides both a powerful object-oriented scripting environment and a powerful object-oriented programming environment. Each object or script contains a set of commands. The object library contains commands for creating objects, maintaining objects, defining objects, and changing properties of objects. The WinTask scripting language is similar to Visual Basic Scripting Edition. You can create scripts for Windows Scripting Host or with the WinTask scripting language. This is achieved by programming with the WinTask Scripting Language (WTSL) or with Visual Basic for Applications (VBA). WinTask Scripting Language (WTSL) WinTask provides a programming environment that makes it easy to develop scripts. The WinTask scripting language is similar to Visual Basic Scripting Edition. In this scripting language, you can create scripts for Windows Scripting Host or with the WinTask scripting language. This is achieved by programming with the WinTask Scripting Language (WTSL) or with Visual Basic for Applications (VBA). What's new in this release? We continue to add more and more features

---
