Windows Update Notifier is a compact and portable application that notifies you whenever new Windows updates are available for download. It contains just a few intuitive settings that can be adjusted by anyone, regardless of the experience level. Windows Update Notifier Current Version: 7.0.2235.0 Windows Update Notifier is a portable application that notifies you whenever new updates are available for download. It contains just a few intuitive settings that can be adjusted by anyone, regardless of the experience level. Since installation is not a requirement, you can drop the executable file anywhere on the hard disk and just click it to run. There is also the alternative of saving Windows Update Notifier to a USB flash disk or similar storage unit, to be able to run it on any PC quickly and without previous installers. What's worth mentioning is that the Windows registry does not receive new entries, and no other files are created on the HDD, leaving it clean after removal. At startup, Windows Update Notifier creates an icon in the system tray area and runs in the background, popping up messages from the bottom right corner of the screen on every new update available. As far as settings are concerned, you can set the tool to automatically run at system startup, hide the tray icon when no updates are available, disable notification pop-ups or use the Metro style, as well as establish the time interval for searching for updates. In addition, Windows Update Notifier is able to install Windows Defender updates automatically. The program is very low-demanding when it comes to CPU and RAM, so it does not hog system resources. Since it sits quietly in the system tray area, it does not affect normal user activity. We have not come across any problems in our tests, since it did not hang, crash or pop up error dialogs. All in all, Windows Update Notifier delivers a simple solution to keeping Windows up to date. It's a program that allows me to check for all updates for programs, drivers, and security in one go. And also allows you to run a scan for Windows. I noticed it took almost ten minutes to find all that and download it, so it's not exactly a quick tool, but it is not really long to find and download all the updates. In my PC with Internet connection and no problems at all. I think it is not so good. They do not tell you how to find for updates. They also do not work for me, find few updates.
